**TailWind™**

## TailWind One Page Executive Summary

**Market**

TailWind recognizes that Fortune 1000 companies especially Energy, Technology, and Pharma organizations have committed to solving their delivery problems. CIOs will purchase TailWind solutions to solve issues with Sales organizations, Field Services, Training programs, and Customer Service operations. This managed delivery market is estimated to be 7.31 billion dollars by 2005.

**Current Customers**

TailWind currently provides software solutions to Pfizer Corporation and is in final review at the United States Navy—organizations that reflect software application solutions for diverse markets—from private sector to government, from pharmaceuticals to military. Additional capital will enable us to complete our penetration of those and additional targeted markets such as oilfield services.

**Business Description**

TailWind's premier product, FieldSpace, is available as a laptop solution. At its heart is a software platform for relaying persistent Internet-based resources, applications, and media from one computer to another when server based networks are unreliable or intermittent. Built on .NET, TailWind's proprietary, patent-pending software platform leverages a defensible mix of sophisticated technologies.

**The Need**

The delivery of "big files" in large organizations is an Achilles heel. From customer support to sales, management struggles with delivering, securing, tracking and updating large files downloaded by their employees.

*"A Fortune 500 automotive company employs 150 sales reps across North America to sell car parts to dealership technicians and mechanics. The vice president (VP) of sales regularly sends more than 250 meabytes (MB) of digital content to field sales reps, including pricing lists, photos of customer premises, sales presentations, and buying history. The sales VP presses the CIO to guarantee delivery to each and every sales rep."*

**Founding Team**

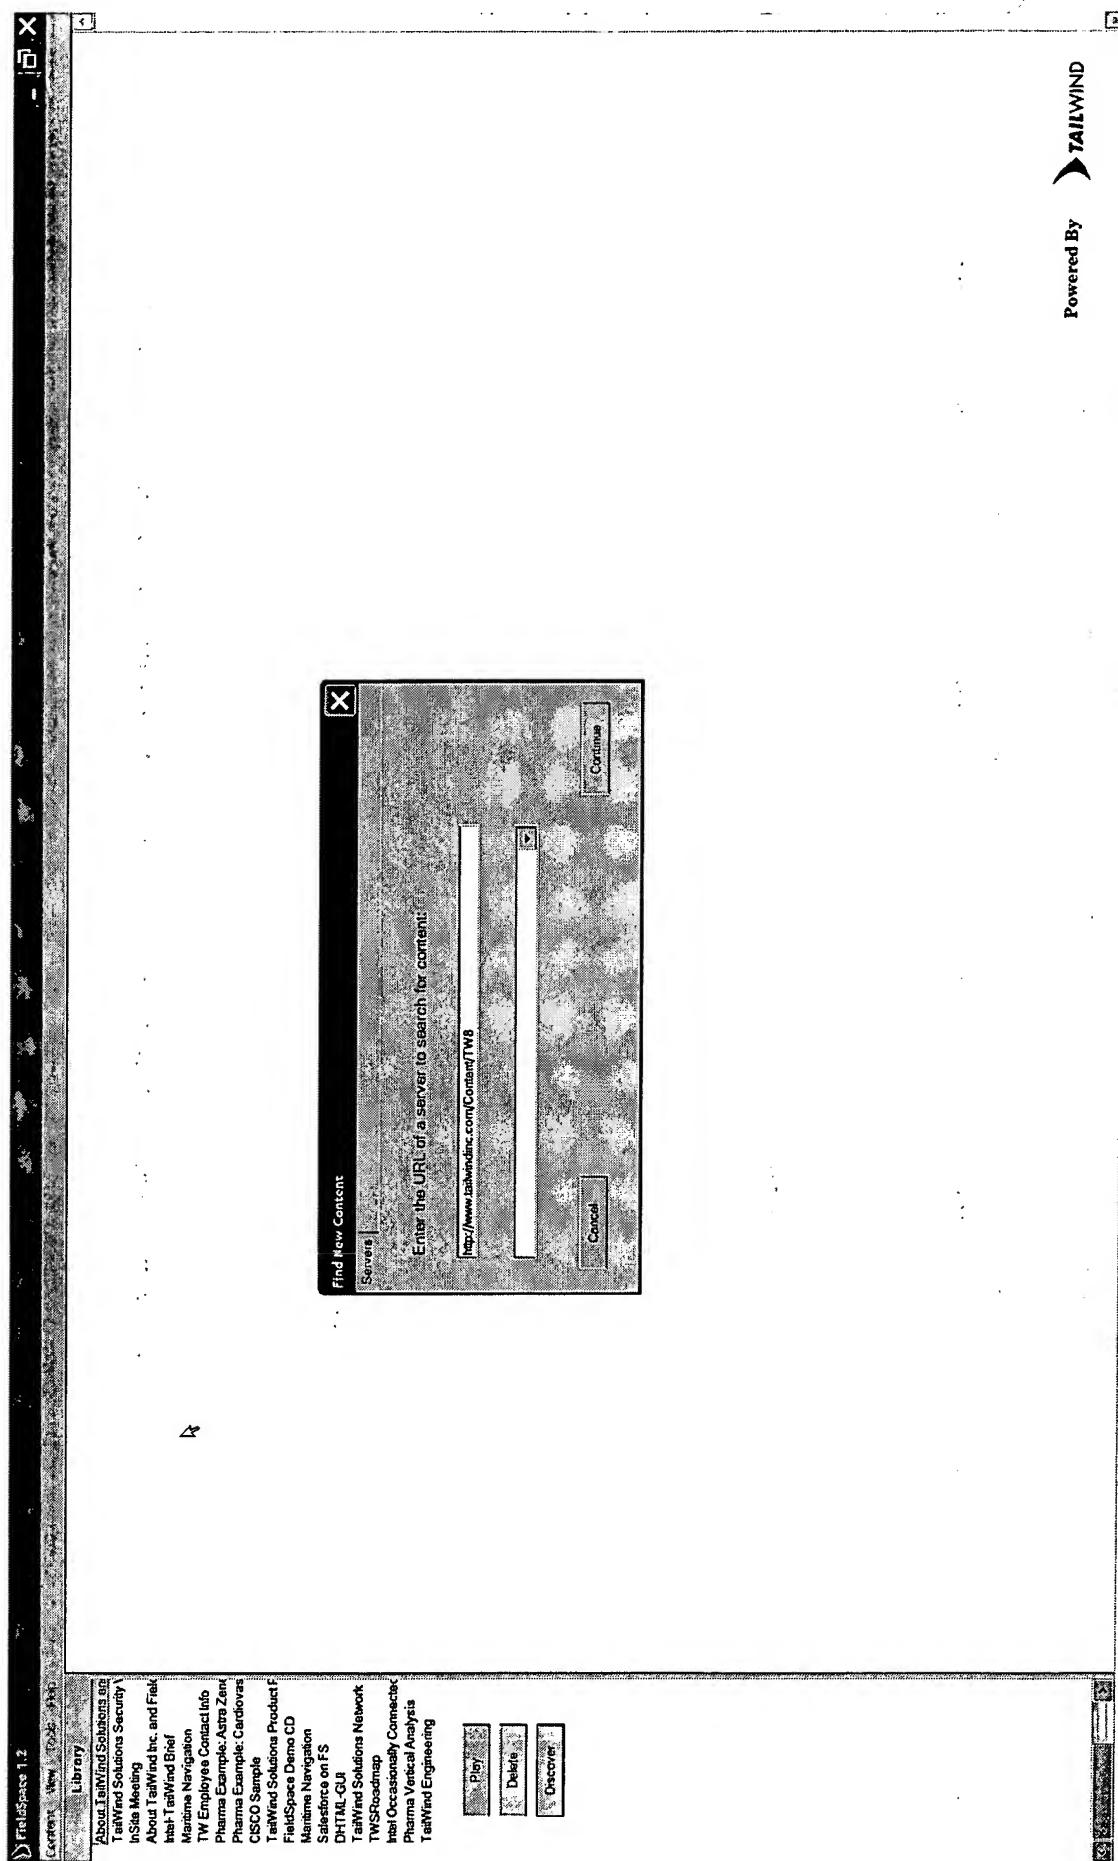

TailWind's founding executive team comprises professionals with decades of combined experience in engineering, business management, training, marketing, sales, and sales management.
